Summary

I am an enthusiastic games design graduate seeking an opportunity in the gaming industry.

I have been a huge fan of video games, particularly racing and driving games such as Forza, Burnout and Need For Speed, since I was a child. Over the years, my passion for playing games has turned into a real zeal for working in a studio and crafting engaging and immersive gaming experiences - I am eager to learn, grow, and contribute.

I have good skills in making game assets in Unreal Engine, Unity and Blender, as well as in game project management.
